Subject: RE: Bremerton Gas Works Tolling Agreement

Hello Lindie and Erika –

I hope you are both well. We expect to gain EPA's approval of the Bremerton Gas Works Remedial Investigation/Feasibility Study Work Plan in the next few weeks. The approval will enable the collection of surface sediments adjacent to the Site and within the Port Washington Narrows this summer.

In preparation for the sampling, we have compared our sample locations to the DNR land ownership and Kitsap County parcel records. The DNR records at locations offshore of the City of Bremerton's Lions Park (see the attached embedded map and DNR metadata) appear to be privately held second class marine tidelands (I assume they may be owned by the City). As noted in Column AP of the attached, there appears to be deeds associated with these parcels dating back to 1902 through 1915. Do you know if these deeds are available so we can confirm who owns these tidelands?

Any help you can provide to point me in the right direction would be appreciated.

Thank you,

Nathan Soccorsy
